

40% of CAPEX

But no real-time visibility

Different owners

Almost never connected in real time

90 minutes of Re-Entry delay

10–30 minutes shouldn't exist.

The problem isn't safety. It's visibility.

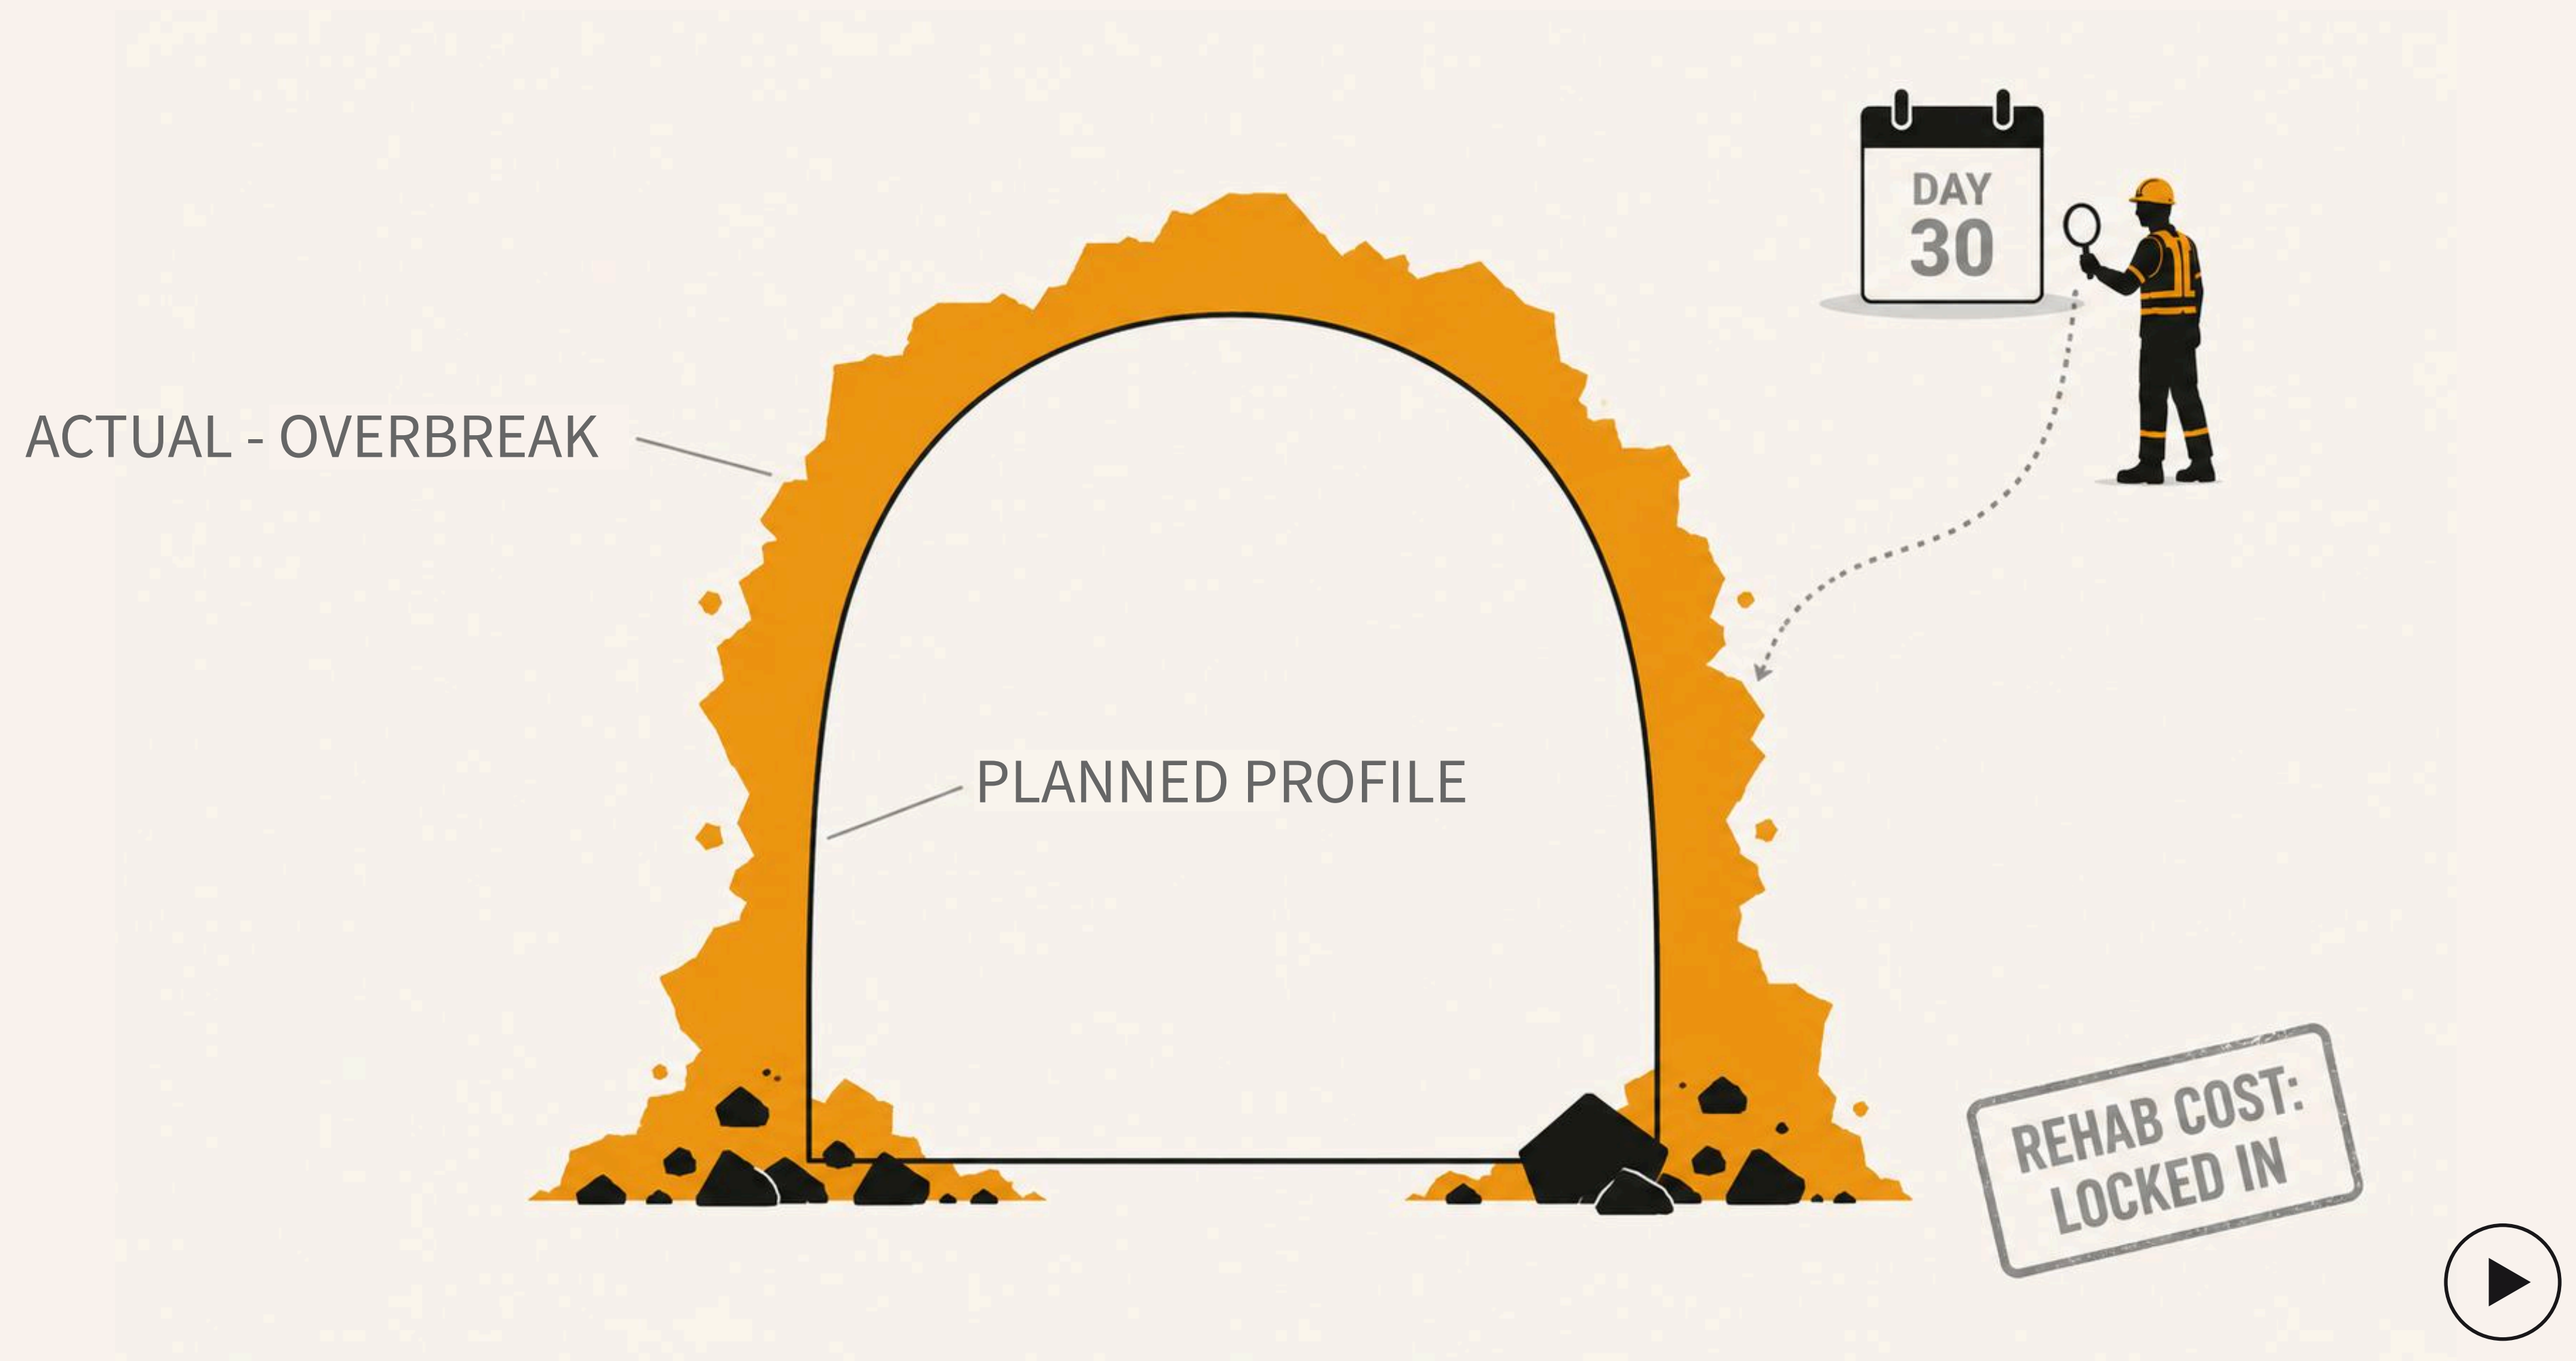

Longest step: Ground Support

No visible delay. Just less advance.

No live view of overbreak

Not managed daily. Cost already locked.

Baseline: 18.5 metres per shift

Target: 20 to 22 metres

**That gap is worth
\$4.2 million per year**

in ore value at a single heading

Not a drilling problem. Not a blasting problem.

A visibility problem.
