

SimpleSIC

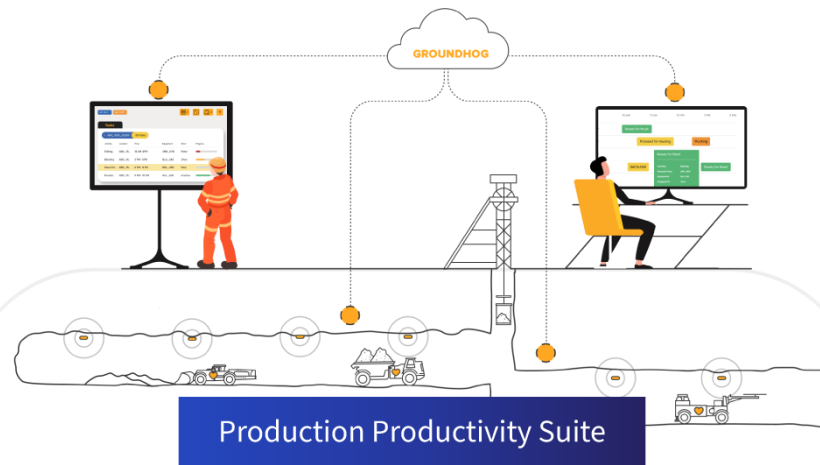

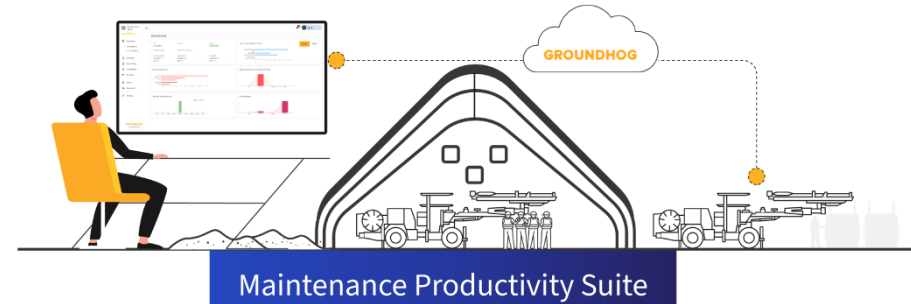

Lean. Mean. Powerful.
Powerful.

*Short Interval Control of Lean
Sites*

DITCH EXCEL, BREAK SILOS, SIMPLIFY WORK

Unified Productivity Platform

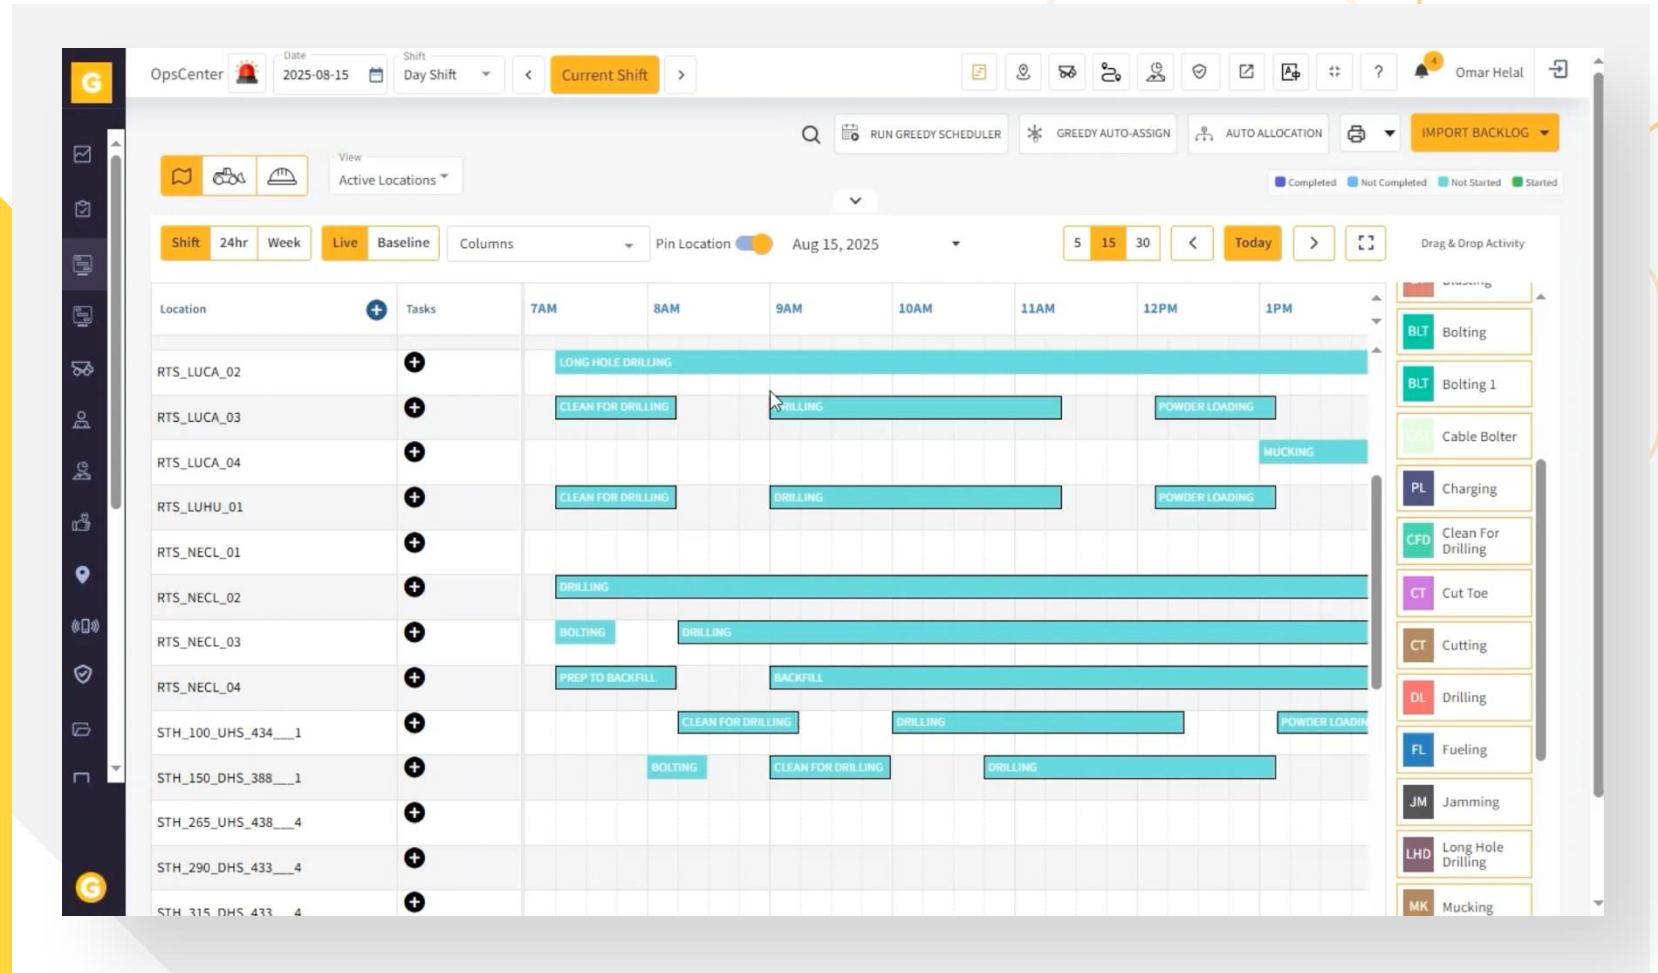

Customers all over the world!

Primarily known for Enterprise SIC

Key Features

- Easy-to-use scheduler
- Track actuals
 - Dispatch mode
 - Operator Mode
 - Telemetry Mode
- Powerful Reporting
- Integrated RTLS & CAS
- Integrated Maintenance
- Integrated Safety
- Peer-to-Peer

Matt S (BI) *"Love the automation"*

Miguel (GM) *"Flexible"*

Paul S (Planner) *"Insightful analytics"*

Steve I (CI) *"Super powerful"*

Sam H (IT) *"Seamless integrations"*

"Who rave about us"

"Your system is super powerful – it has everything we need. I'm not sure our team is ready for it – what you are offering is a Ferrari – my team rides bicycles – I first need to teach them to drive a car"

GM George

- GM George needs to hit his numbers Dispatch mode
 - Production
 - Variance
 - Availability & Utilization
 - Cost per foot & Cost per ton
 - “Everyone goes back home safe”

- GM George runs with a lean staff
- GM George wants to increase productivity
- Needs clear, real-time data for decision-making
- Stays prepared for unexpected operational challenges
- Keeps unplanned downtime to a minimum

What's on GM George's mind

Tom the Tech guy

- Every site has a Tom
- Home grown system
 - Using Excel and Databases
- These home-grown tools are very effective
 - As long as Tom is around
 - Scaling and replicating is a challenge

Tom gets stuck with this

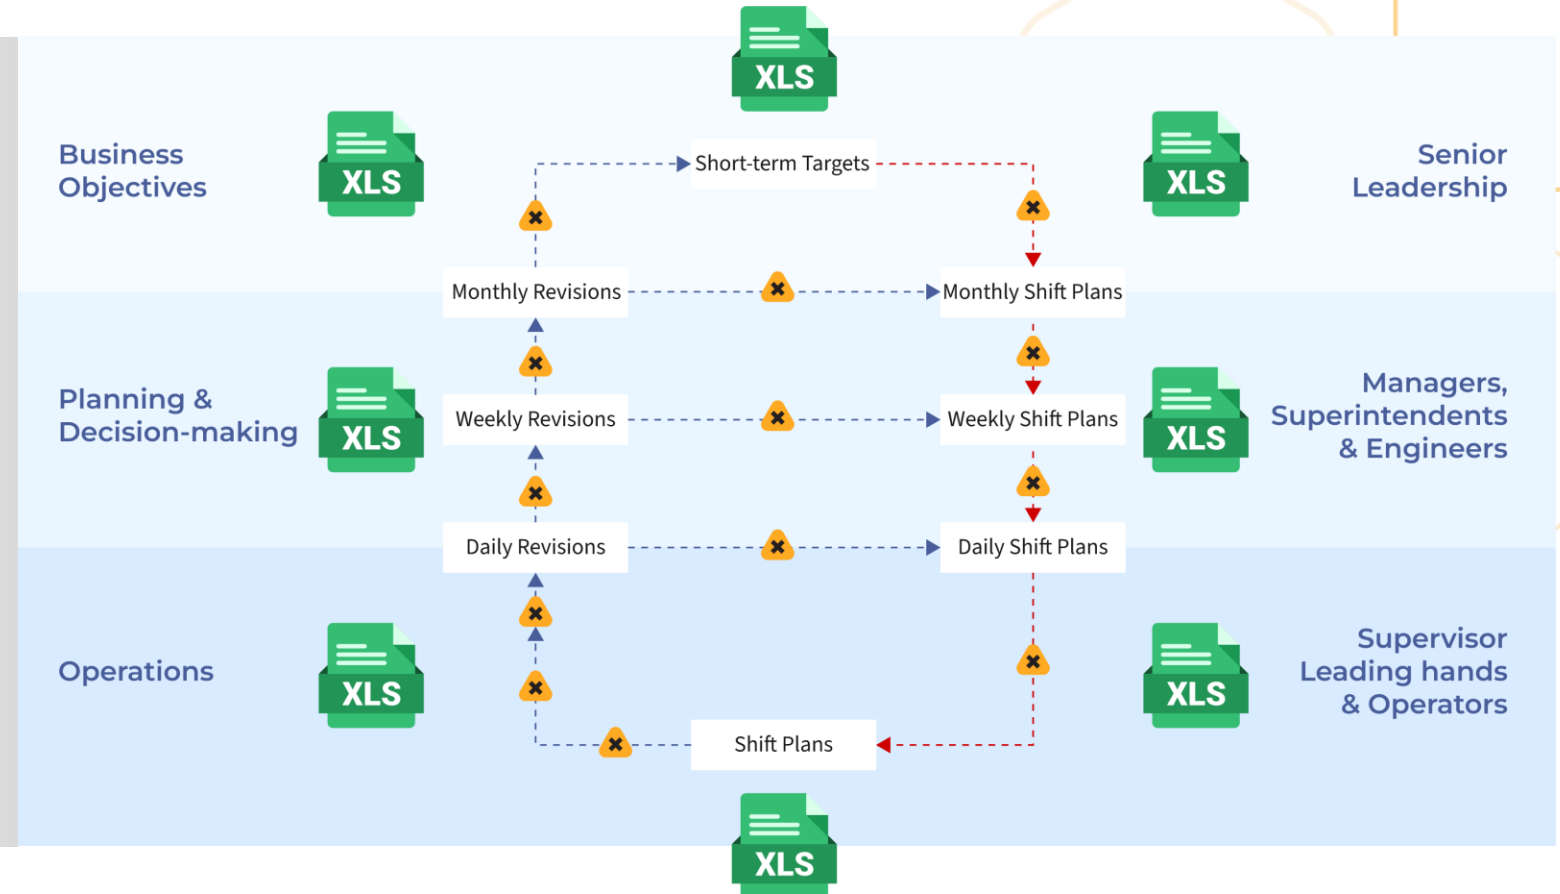

Mashup of home-grown tools takes over a life of its own

Frequent data entry mistakes by foremen lead to heartburn

Tom still has a job to do — the role he was hired for, delivering results.

GM George's parent company

Additional tools to
normalize and merge
data from different sites

Prone to data entry
errors

Easy Shift Planning

Simple Data Entry

Automated Reporting

Powerful Analytics

Cross-project, Company-wide analytics

“GM George runs with a lean staff”

GM George wants to increase productivity

built for GM George's Lean Site

A screenshot of the SimpleSIC software interface. At the top, there's a header with the SimpleSIC logo and 'OpsCenter'. Below the header, there's a navigation bar with 'Date' (2025-01-12), 'Shift' (Day Shift), and 'Current Shift'. A user profile for 'Peter Parker' is in the top right. Below the navigation bar, there's a table with columns: Zo., Location, Cost Co., Priority, Material, Heading Status, Working Today, Next Blast, Design Distance, Current Distance, Comments, and Last Updated. The table contains 18 rows of data, each representing a different location or project. The 'Priority' column uses color coding: Medium (orange), Critical (red), and High (green). The 'Working Today' column has checkboxes for 'Yes' and 'No'. The 'Next Blast' column shows dates and times. The 'Design Distance' and 'Current Distance' columns show measurements in feet. The 'Comments' column has a plus icon for each row. The 'Last Updated' column shows the date and time of the last update.

SimpleSIC: Easy Shift Planning

SimpleSIC: Easy Shift Planning

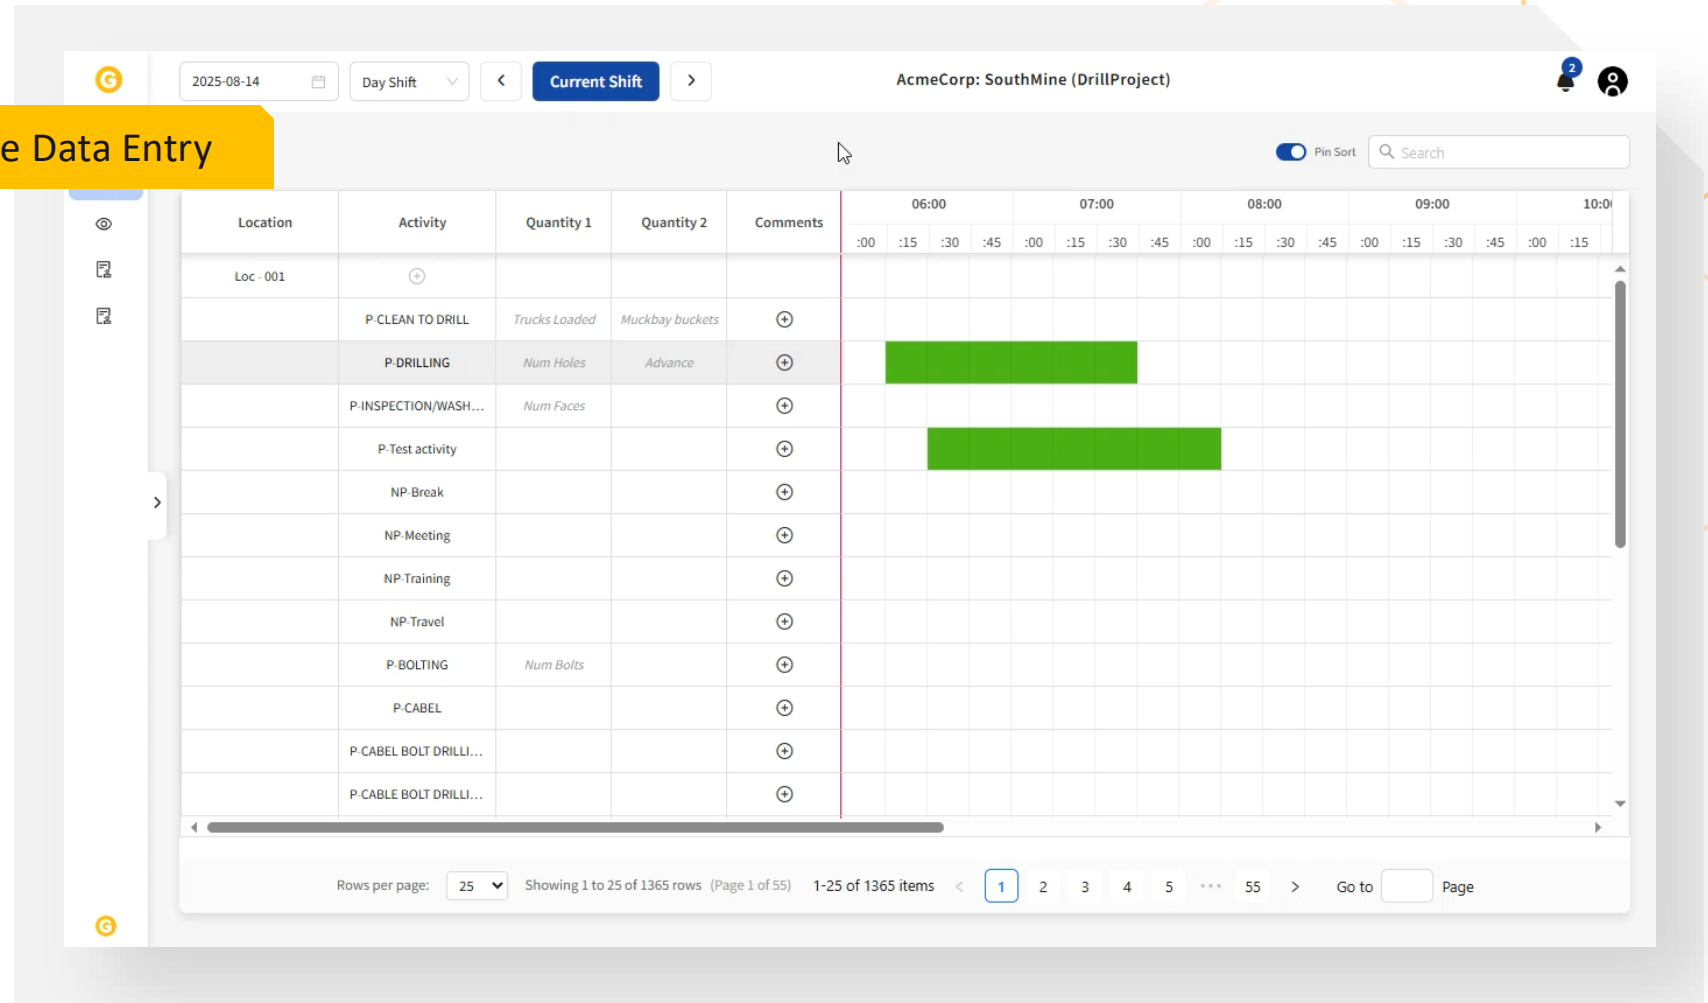

Quickly assign crews and tasks with a simple visual planner. Drag and drop operators, machines, and locations in seconds. Start each shift with everyone on the same page.

SimpleSIC: Simple Data Entry

Operators log production, delays, and progress in seconds, reducing paperwork and giving supervisors accurate information without delays.

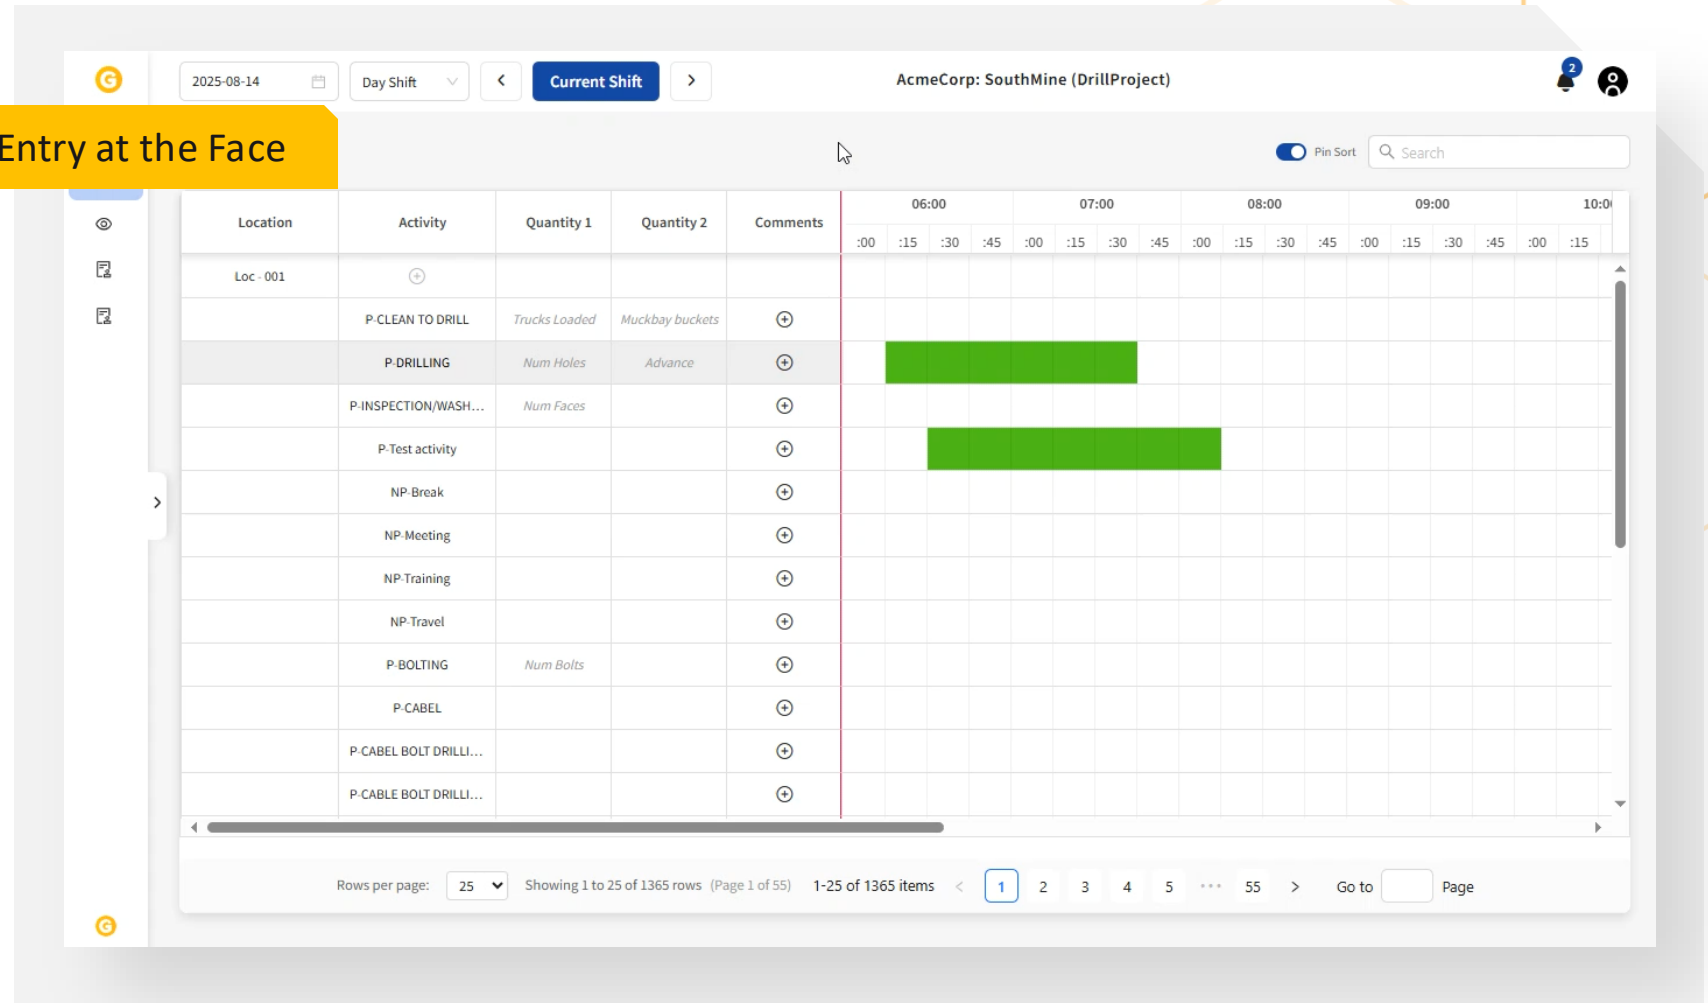

SimpleSIC: Simple Data Entry

SimpleSIC: Data Entry at the Face

Capture shift data directly at the face so production, delays, and consumables are tracked in real time where the work actually happens.

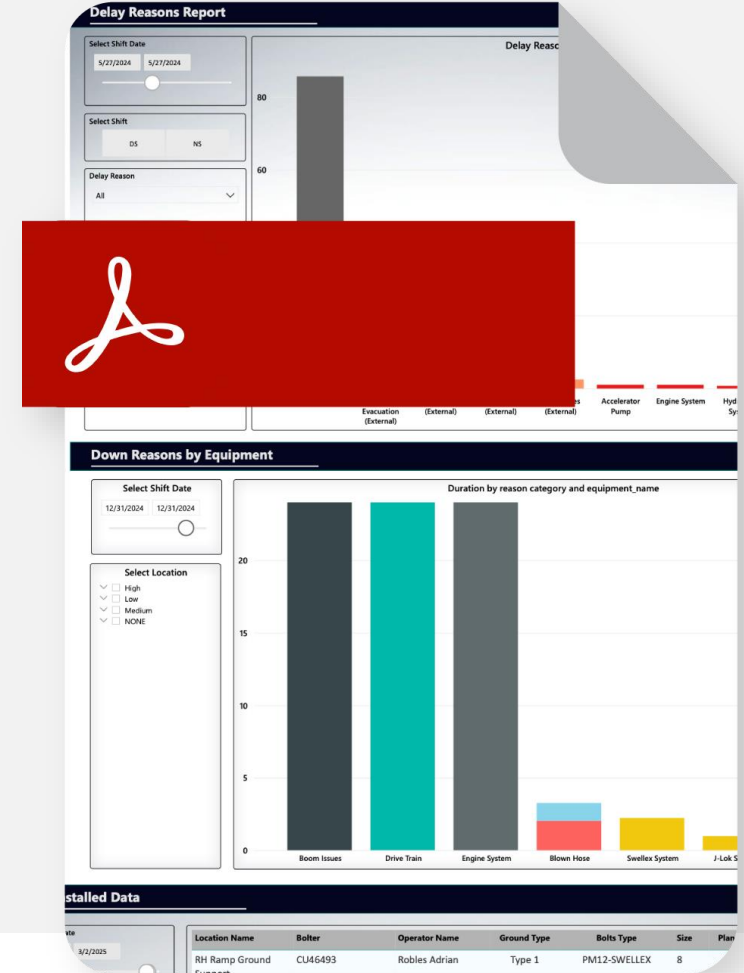

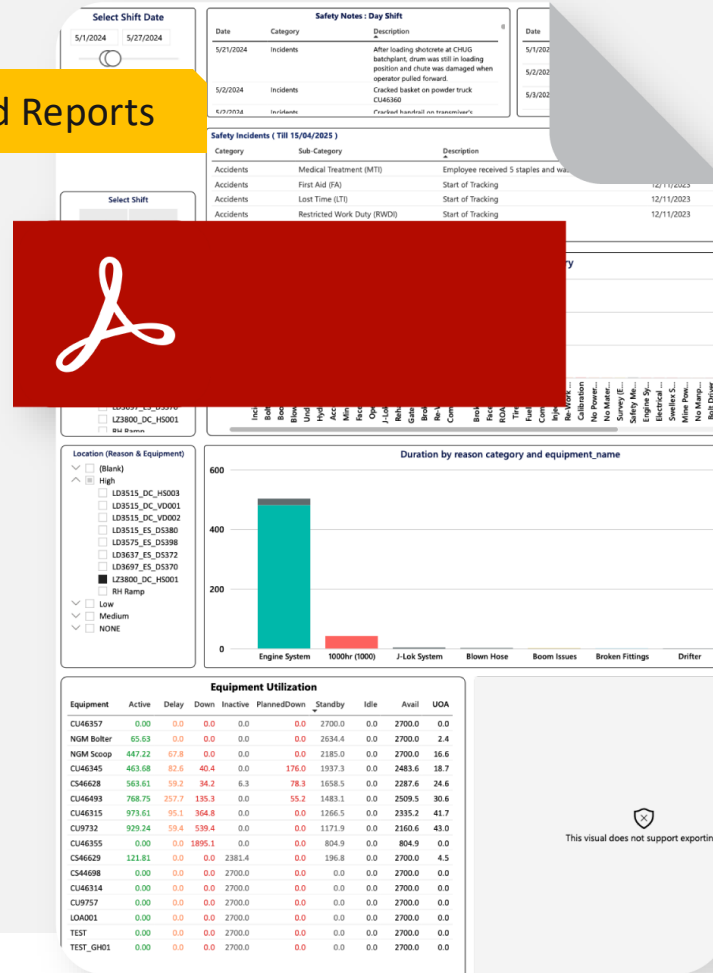

SimpleSIC: Data Entry at the Face

SimpleSIC: Automated Reports

SimpleSIC: Automated Reports

- Daily Review Report
- Actuals vs Footage
- Haul truck counts and tons
- Completed cycle performance
- Equipment utilization
- Consumables
- Crew details

SimpleSIC: Powerful Insights for Continuous Improvement

SimpleSIC: Powerful Insights

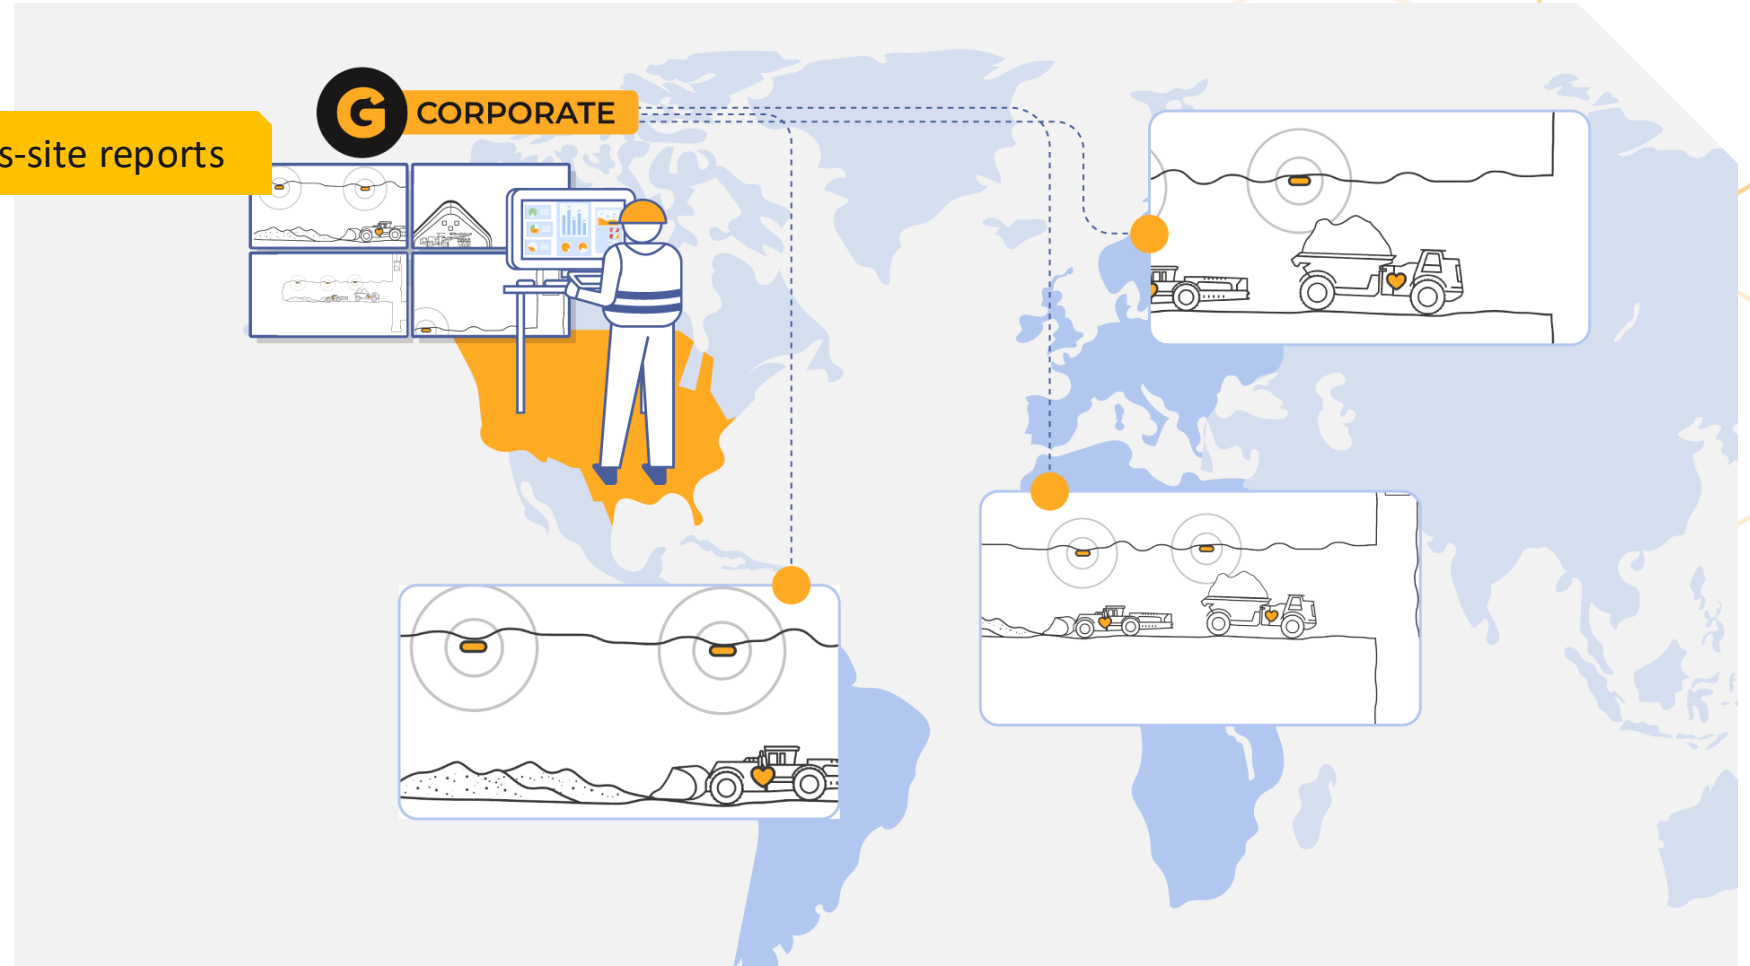

Identify patterns, find bottlenecks, and improve shift performance using real data that highlights where efficiency gains can be made.

SimpleSIC: Consolidated cross-site reports

SimpleSIC: Cross-site reports

See performance across multiple sites in one view, compare productivity levels, and track consistency across your entire operation.

SimpleSIC: Supported 24x7 w/ Performance Engineers

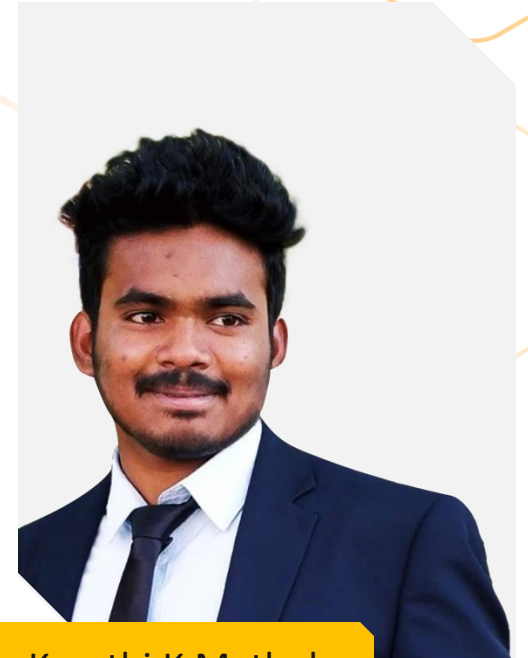

Access expert guidance anytime with 24x7 support from GroundHog's performance engineers to keep your operations running smoothly.

Jason Aucamp

Kranthi K Mathala

...and a seamless path to Digital Maturity

Deploy Simple SIC Quickly

Implement the lightweight Simple SIC solution rapidly, gaining immediate control over your shifts with minimal setup.

- Operational Simple SIC platform, Initial user training & Basic shift control dashboard

Add Modules as Needed

Enhance functionality by integrating additional modules for specialised tasks, such as advanced reporting, resource allocation, and compliance tracking.

- Modular features, enhanced operations & customizable workflows

Seamless Integration

All new modules integrate smoothly with existing Simple SIC setup, avoiding downtime or disruption to ongoing operations.

- Integrated system updates, Continuous ops & Data consistency across modules

Scale to Enterprise SIC

Easily upgrade to full Enterprise SIC for complete mining control without losing prior investments.

- Enterprise control, full shift management, protected investment & data continuity
